Allowable Subject Matter

1. Claims 1-21 allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 12, the applicants have presented persuasive arguments, see pages 7-10 of the response filed on 11/21/2006, that the cited prior art of Ling fails to disclose or suggest a step of forming a conformal etch stop layer on the gate pattern and the substrate after removing the spacers, wherein the etch stop layer is formed to a thickness of at least the bottom width of the spacers because Ling discloses forming the undoped oxide layer 113, which is alleged to correspond to the etch stop layer, before the nitride spacers 134 are removed/ the layer 32, as taught by Pradeep, does not function as a conformal etch stop layer because it is readily etched from the top of the electrodes 14 and 16 and the surface of the substrate 10 between the electrodes 14 and 16 as shown in FIG. 5. Therefore, the rejection(s) of claims 1, 12 under 35 U.S.C 102(b) based on Ling and Pradeep has been withdrawn

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
